Feasibility Study

Todd Brang (Principal), Brian Bell (Education Planner), Lily Lovelady (Project Coordinator), and Seth Schweitzer (Project Manager) from Lewis Group Architects presented the findings of the Feasibility Study.

Option 1: New Central Elementary-Middle School (Pk-8), GCHS (9-12), SGCES (PK-4), SGCMS (5-8), SGCHS (9-12)

Kenton, Rutherford, Spring Hill, Dyer, and Yorkville would consolidate into a new K-8 school. Students would transition to the new facility, which would provide access to modern learning environments and enhanced K-8 programming, promote stronger academic alignment across grade levels, expand extracurricular opportunities, and enable more strategic and efficient staffing.

Option 1a: Kenton (PK-4), New Central Elementary-Middle School (PK-8), GCHS (9-12), SGCES (PK-4), SGCMS (5-8), SGCHS (9-12)

Rutherford, Spring Hill, Dyer, and Yorkville would consolidate into a K-8 school, while Kenton would remain open as a PK-4 school. Closing four aging campuses and replacing them with a single modern facility improves energy efficiency, optimizes staffing, and enhances space utilization. Maintaining Kenton preserves community access and limits the scale and cost of new construction. However, total operational savings would be more moderate than under full consolidation.

Option 1b: Kenton (PK-8 adding 4 classrooms), New Central Elementary-Middle School (PK-8), GCHS (9-12), SGCES (PK-4), SGCMS (5-8), SGCHS (9-12)

Rutherford, Spring Hill, Dyer, and Yorkville would consolidate into a K-8 school, while Kenton would open as a PK-8 school, adding 4 additional classrooms. Closing four aging campuses and replacing them with a modern facility improves operational and staffing costs and reduces long-term maintenance costs. Utilization remains under 40% with the increased functional capacity.

Option 2: New Central Elementary (PK-4), New Central Middle at Rutherford with addition (5-8), GCHS (9-12), SGCES (PK-4), SGCMS (5-8), SGCHS (9-12)

Kenton, Rutherford, Spring Hill, Dyer, and Yorkville would close as individual campuses. The Rutherford school would be converted into a centralized 5-8 middle school, creating stronger academic teams, expanded extracurricular opportunities, and more efficient staffing. A new central elementary (PK-4) would serve students from the affected communities, provide modern learning spaces, consistent programming, and broader support services. By consolidating students into fewer, better-equipped campuses, the district can focus on resources where they have the greatest impact.

Option 2a: Kenton (PK-4), New Central Elementary (PK-4), New Central Middle at Rutherford (5-8), GCHS (9-12), SGCES (PK-4), SGCMS (5-8), SGCHS (9-12)

Spring Hill, Dyer, and Yorkville would close as individual campuses. Kenton would remain as a Pre-K elementary school, and Rutherford would be repurposed into a centralized 5-8 middle school to improve academic alignment, expand extracurricular offerings, and support more efficient staffing. A new central PK-4 elementary school would serve Spring Hill, Dyer, and Yorkville, providing updated facilities, consistent programming, and expanded support services. By concentrating resources on fewer, stronger campuses, the district can improve instructional quality while managing long-term costs.

Another option is to keep the existing structure: system-wide upgrades.

This is the least operationally efficient path forward. Yorkville (53% utilization) and Rutherford (58% utilization) would continue operating well below capacity, meaning the district pays high utility and maintenance costs for significantly under-filled buildings, and declining enrollment in certain zones goes unaddressed. It preserves the existing community-based school structure, avoiding the disruption caused by closures. It addresses pressing safety needs—most notably, by adding secure vestibules to all campuses to improve perimeter control.

The estimated cost of secure vestibules includes access control work, security film, MEP, doors and hardware, sheet rock and repairs, masonry repairs, flooring, ACT, security cameras, and paint. Pricing assumes projects are completed individually and that there is no travel or per diem, no night work, and open space not during school.

The board members questioned whether a community impact study had been conducted, noting that it was not included. They discussed taking the data to the individual communities by creating committees to discuss the results of the study, composed of board members, principals, teachers, community members, and students.

The feasibility study will be available on the website, along with a link for people to ask questions.

A motion was made by Mr. Eddie Watkins to approve the board member and principal of each school to create a committee made up of the board member, principal, teachers, community members, and students to discuss the results of the feasibility study, and bring the findings to the August board meeting, with a second by Ms. Treva Maitland. *Motion passed.*

Mr. Rory Hinson presented the Yorkville Freezer Bids.

Jackson Restaurant Supply for \$26,939.

Allied Service Group for \$33,712.10

A motion was made by Mr. Tom Lannom to approve the Jackson Restaurant Supply bid for \$26,939.00, with a second by Mr. Eddie Watkins. *Motion passed.*

Mr. Eddie Pruett presented the 2026-2027 Annual Agenda & Board Meeting Schedule.

A motion was made by Mr. Tom Lannom to approve the annual agenda and board meeting schedule, with a second by Mr. Scott Ball. *Motion passed.*

A motion was made by Mr. John Campbell II to approve the Honors and ESPO courses, with a second by Mr. Benny Boals. *Motion passed.*

In addition, they will participate in Response to Intervention (RTI), have daily recess and physical education (PE), and engage in STREAM activities (Science, Technology, Reading, Engineering, Arts, and Mathematics). The Tennessee Department of Education allocated \$477,647.31 for the Summer Program.

Vehicle Dimension and Performance Summary

Performance predictions in this report represent an estimate of vehicle performance based on standard operating conditions. Variations in customer equipment, load configuration, ambient conditions, and/or operator driving techniques can cause significant variations in vehicle performance. These values are not representative of results that may be shown in actual dynamometer tests. This report should therefore be used as a guide for comparative vehicle performance.

Prices and content availability as shown are subject to change and should be treated as estimates only. Actual base vehicle, package and option pricing may vary from this estimate because of special local pricing, availability or pricing adjustments not reflected in the dealer's computer system.
