Monitoring: <b>Review: Annually, in October</b>	Descriptor Term:  <b>Social Media</b>	Descriptor Code: <b>4.4065</b>	Issued Date: <b>10/06/2025</b>
		Rescinds:	Issued:

The purpose of this policy is to establish guidelines and provide direction for district employees when participating in online social media activities. The Superintendent or his/her designee shall establish procedures to ensure effective administration of this policy.

## **Definitions**

**Social media:** Includes any and all forms of online publication where individuals engage in conversation or exchange of written information or images (such as blogs, micro-blogs, wikis, podcasts, virtual worlds, user rating services, messaging sites, and social networks). Social media tools include online sites such as Twitter, Facebook, YouTube, Wikipedia, Instagram, Pinterest, Snapchat, and LinkedIn. These examples are included by way of illustration and not limitation; new social media platforms are continually emerging, and the named tools shall not constitute an exhaustive list of social media governed by this Policy.

**Professional Use:** Refers to an employee’s personalized presence on social media to advance a program or function of the Lakeland School System as part of the employee’s job responsibilities.

**Personal Use:** Refers to an employee’s personalized presence on social media, initiated at will by the employee, to advance a personal objective.

**Disruption to the school environment:** Includes any interference with the school environment or violation of Board policy.

## **Social Media Guidelines**

Lakeland School System employees shall refrain from using social media for school-related messaging unless otherwise approved by a school or department administrator. The primary method of school communications shall be district-provided communication tools.

Professionalism should be maintained in all interactions with students, staff, their families, and the community whether engaging in-person or electronically via social media. Failure to do so may place an employee in violation of Board policy and at risk of discipline.

By accessing, creating, or contributing to any professional use of social media, Lakeland School System employees agree to abide by the expectations incorporated in Policy 4.406 - Use of the Internet and Policy 5.611 - Ethics.

District employees remain personally responsible for content published by, attributable to, or connected with their presence on social media. Online behavior should reflect the same standards of honesty, respect, responsibility, and consideration required of Lakeland School System employees engaged in

---

in-person communications. Online conduct resulting in a disruption to the school environment, whether resulting from professional or personal use of social media, may be subject to disciplinary action up to and including dismissal.

### **Professional Use of Social Media**

District employees are prohibited from using personal social media accounts for official school purposes. If a Lakeland School System employee wishes to incorporate social media into the curriculum or educational program, he or she must first inform and receive approval from his/her school or department administrator and receive express parental informed consent for third party social media platforms. Social media use in the classroom should be incorporated only in cases where the educational benefit outweighs the potential risks of participation. Upon approval by an administrator, district employees may establish a classroom social media account or page using district contact information, including school email account, address, and voicemail extension.

Professional use of social media shall be considered an extension of the classroom, and all content associated with such use shall adhere to classroom and professional expectations. Copyright and fair use guidelines should be maintained, and the school and/or district name, logos, and images may not be used without receiving prior permission. District employees incorporating social media into the classroom shall maintain the primary responsibility for monitoring such use, and what is inappropriate in the classroom should be deemed inappropriate online. Social media interactions with students should demonstrate the highest levels of professionalism and should adhere to all district policies regarding student records, safety, privacy, codes of conduct, and ethics.

Any student information communicated through social media platforms must comply with all district policies on student privacy and student records. In addition to the privacy requirements set forth in Board policy and in the Family Educational Rights and Privacy Act (FERPA), a student's participation in third party social media sites as part of a district activity shall require express parent informed consent. As part of such consent, parents must be made aware, in writing, that the district is unable to control such third-party sites, that the activity is optional, and that, should the parent decline to consent, a suitable and educationally-equivalent alternative activity or assignment will be made available.

The district recognizes that student or community groups may create social media accounts representing students or groups associated with the district. If and when district employees join or engage with these social networking groups, they do so as representatives of the district and are encouraged to use a professional social media account. In this capacity, whether on or off duty, all employees are responsible for maintaining appropriate employee-student relationships and have further responsibility for reporting and/or addressing inappropriate behavior or activity on these networks. This responsibility includes maintaining student confidentiality, acting to protect the safety of minors online, reporting abuse, bullying, or harassment, and adhering to the Teacher Code of Ethics. Failure to do so could put an employee in violation of existing district policies and at risk of disciplinary action.

### **Personal Use of Social Media**

District employees are prohibited from using personal social media accounts for official school purposes. Online fraternization between Lakeland School System employees and Lakeland School System students is strictly prohibited, except as outlined above in the section on Professional Use of Social Media. Employees may not use personal social media to solicit or accept "friend" requests or

---

other social media connections from Lakeland School System enrolled students or former students who continue to be minors. This prohibition shall not apply to any “friend” connection between a Lakeland School System employee and members of his or her family.

District employees are encouraged to remember that intentional messaging and privacy protections help distinguish personal comments from those communicated on behalf of Lakeland School System. Employees are encouraged to make clear that the view expressed on his/her social media is not the official view of Lakeland School System. Employees shall never use personal social media in any way purporting to be or speaking for Lakeland School System.

Even when incorporating the most restrictive privacy settings, employees should assume that all postings are in the public domain. Employees should understand that comments made using certain social media platforms are not protected by privacy settings. Online conduct resulting in a disruption to the school environment, whether resulting from professional or personal use of social media, may be subject to disciplinary action up to and including dismissal.

**Reporting Notification, and Training**

Improper uses of social media shall be referred to the building administrator and/or Lakeland School System Department of Human Resources for investigation. This Policy shall be disseminated annually to district staff, students, and volunteers via the Acceptable Use of Technology form and the Lakeland School System website. All district employees and volunteers shall be educated on this Policy, acceptable use of social media platforms, and related administrative procedures.
